EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Page 1, paragraph 1, line 4, after "2001"

- - - , now Japanese Patent Number 2003 168660 A - - -

Response to Declaration

Examiner would like to thank applicant for taking the time to file the declaration, filed 6/20/2006, which shows testing results which are significant in that they compare the claimed invention with art that is closely related to applicants' invention, and demonstrates that the omission of any one of the six claimed components would produce the inferior polishing property of dishing.

Allowance

Claim 1-3 allowed. The following is an examiner's statement of reasons for allowance: The closest prior art, Yano (6,740,590) only discloses a slurry comprising four of applicants six components. In contrast the comparative testing set forth in the declaration, filed 6/20/2006, demonstrates the omission of any one of the six components would produce the inferior property of dishing, the declaration also showed and no dishing would occur when all six of the components were included in the composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
